A Business Partner Solution"***

AMX METALS COMPANY INFO

www.amxmetals.com

*“Quality, Service,
A Business Partner Solution”*

AMX Metals is an international trading company dealing on ferrous and non-ferrous metal scrap, as well as electronic scrap (e-scrap), plastics and base metals.

Our management team has over 30 years of experience on the metals and recycling industry. Our constant commitment to deliver services and products of the highest quality has allowed us to build a reliable base of customers and suppliers around the world.

***“Quality, Service,
A Business Partner Solution”***

Along the history of AMX, we have had the opportunity to operate a small foundry, and a recycling plant in Monterrey, Mexico. These experiences allowed us to get to know the different aspects of the recycling industry, from sourcing and sorting, to re-melting the scrap. Thanks to this, we are able to better understand the needs of our suppliers and customers, which is key in our ability to offer them a better service.

What we offer:

- Excellent service
- Logistic support
- Highly trained staff
- Risk management
- Quick payment
- Professionalism and ethics
- Competitive prices

***“Quality, Service,
A Business Partner Solution”***

In AMX Metals we believe that success is not reached overnight, and that our growth depends on the growth of our suppliers and our customers. This is why we focus on developing long term relationships, and not just one time deals.

AMX has presence through vendors, customers and agents in the following countries:

- USA
- Spain
