## Reporting

Daily electronic reports

# What does **REAL-TIME** information mean to you?

- Data entered in a computer the following morning (**24 hours later**)?
- Data entered in a computer at the end of a shift (**8 hours later**)?
- Data entered in a computer throughout the shift (**2 hours later**)?
- In each of these examples, you will receive real-time information **when the data is entered in the computer**

Shouldn't real-time information mean that **data is collected as the work is being performed and be automatically reported?**

# REAL-DATA TIME COLLECTIONS

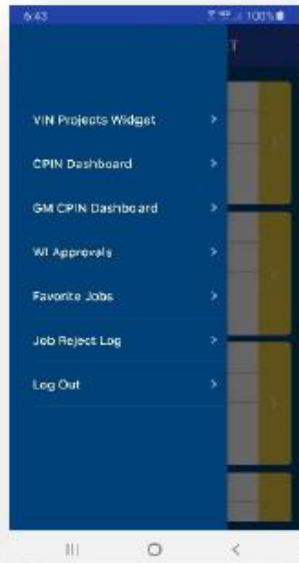

ATCO collects project data **as the work is being performed** and share it with our clients real-time through various methods in **less than two minutes** from data entry

## **We collect essential data with every action:**

1. **Product** part number, quantity inspected/rejected and pallet/part serial information
2. **Non-conforming pictures** of each reject
3. **Time worked** for each employee (name, start/end times, etc.)

Note: Network connectivity limited to the área or zone

# REAL-DATA TIME REPORTING

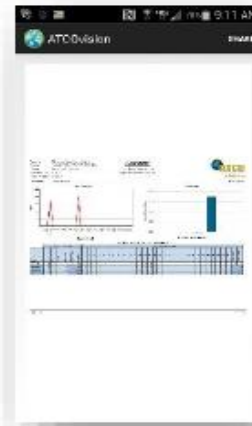

## At your fingertips:

- ✓ Complete project reporting **including reject pictures**
- ✓ Work instruction approval interface (with notifications)
- ✓ Yard Sweep details
- ✓ All information can be shared via email or text with touch of button
