

VERIFICATION OPINION
PERIOD COVERED: 01/01/2022- 31/12/2022

**VERIFICATION OPINION OF THE INVENTORY OF EMISSIONS OF
GREENHOUSE GASES 2022 PERIOD OF
GRUPO TRAXIÓN, S.A.B. DE C.V.
ACCORDING TO INTERNATIONAL STANDARD ISO 14064-3:2019**

TRAXIÓN
VIDA EN MOVIMIENTO

The verification team assigned by Áddere Solutions, S.C., was hired to verify the GHG statement for 2022 period of Grupo Traxión, S.A.B. de C.V. of the Sector IAF MD 14 II. Transport and based on technical particularities and formulas for application of methodologies published in the DOF 3/09/15 and the International Standard ISO 14064-3:2019.

We have carried out verification activities for Grupo Traxión's GHG Tool from the period 01/01/2022 to 12/31/2022, with 590,432.69* tons of CO₂ equivalent verified, excluding the Medistik and Vmodal business units, which are broken down as follows:

Emission categories	Emmissions declared by Traxión (tCO ₂ e)	Modified emmissions declared by Traxión (tCO ₂ e)	Verified emmissions calculated by Áddere (tCO ₂ e)	Original GHG statement materiality (%)	Modified GHG statement materiality (%)
DESS	401.77	406.32	406.48 *	1.25%	0.00%
DESM	561,498.87	566,401.35	563,642.19	0.38%	0.46%
DEIP	17,553.79	23,380.24	23,016.76 *	31.12%	0.06%
IEE	3,551.95	3,374.07	3,366.96	5.21%	0.00%
Total emmissions	583,006.37	593,561.98	590,432.69 *	1.27%	0.53%

DESS: Direct emissions from stationary sources
DESS: Direct emissions from mobile sources
DEIP: Direct emissions from industrial processes, commercial activities and services
DEIP: Indirect emissions from electricity consumption

ERRATUM

* After the issuance of Verification Opinion dated July 21, 2023, non-substantial errors were identified that modify the following data:

DESS: 406.78 tCO₂e

DESM: 23,015.43 tCO₂e

Total emmissions: 590,431.37 tCO₂e

In addition, we verified information about Medistik and Vmodal business units' GHG Tool, from the period 08/01/2022 to 12/31/2022 and 09/01/2022 to 12/31/2022, respectively, with 603.83 tons of CO₂ equivalent verified, which are broken down as follows:

Emission categories	Emmissions declared by Traxión (tCO ₂ e)	Verified emmissions calculated by Áddere (tCO ₂ e)	Original GHG statement materiality (%)
DESS	1.19	1.19	0.00%
DESM	259.77	259.77	0.00%
DEIP	11.44	11.44	0.00%
IEE	331.43	331.43	0.00%
Total emmissions	603.83	603.83	0.00%

DESS: Direct emissions from stationary sources
DESS: Direct emissions from mobile sources
DEIP: Direct emissions from industrial processes, commercial activities and services
DEIP: Indirect emissions from electricity consumption

The verification process included:

- Check of documents, facilities, information systems and interviews carried out on May 4, 17, 19, 23, 24, 25, 26, 29, 30 and 31, 2023.
- Verification of the original statement (excluding Medistik and Vmodal) with an amount of 583,006.37 tons of CO₂ equivalent and materiality of 1.27% and modified statement on 07/13/2023 with values corrected to 593,561.98 tons of CO₂ equivalent and materiality of 0.53% under an limited assurance level.
- Verification of the original statement from Medistik and Vmodal with a quantity of 603.83 tons of CO₂ equivalent and materiality of 0.00% under a limited assurance level.

Grupo Traxión, S.A.B. de C.V.

Folio: N/A

VERIFICATION OPINION
PERIOD COVERED: 01/01/2022- 31/12/2022

With the results obtained, based on objective evidence, Áddere Solutions issues an:

POSITIVE OPINION WITH MODIFICATIONS

for Grupo Traxión, S.A.B. de C.V. GHG statement, dated 07/20/2023 and period 2022.
